

AWARD® Dataroom

The AWARD® Dataroom module provides complex projects with a controlled and stream-lined mechanism for gathering and publishing information, both internally and to Suppliers or Bidders. It provides users with the tools for consistent, efficient and auditable communication. Secure storage and resilient sharing of data ensures that the integrity of data is at the heart of your strategic sourcing projects.

The AWARD® Dataroom module has been developed to specifically meet the needs of strategic procurement projects, delivering best practice ensuring that users' needs are met at every stage of a strategic project. The AWARD® Dataroom delivers:

- Secure, resilient cloud data environment
- Document and workflow management
- Robust user access and management
- Clear, efficient, auditable communication
- Intuitive user interface
- Full reporting capabilities

Procurement solutions to deliver the best possible outcome

Secure

- High resiliency and secure storage of data
- Document status and access control to ensure sensitive data is not compromised
- Controlled and secure communication flows to both internal and external users
- Control of user access - internal and external user permissions management

Document management

- Clear interface for ease of use
- Defined folder structures
- Bulk upload and download for efficiency
- Clear publishing steps to control access
- Quick filtered views for greater clarity
- Document workflow tools
- Controlled document access capability
- Track and audit document access
- Document tagging and searching

User management

- Secure access online – anywhere, anytime
- User management control
- Manage access to folders and documents
- Auditing of user access through reports
- Built in user acknowledgement acceptance

Clear communication

- Clarification capability for bidders/suppliers
- Broadcast notices and document changes
- Consistent, auditable, transparent communications
- Timely secure communication to deliver key information

Intuitive user interface

- Activity feed notifying of key project changes, actions and events
- Clear user interface to manage users and documents

Reporting

- Full transparent audit trail of actions
- Document access reports
- Clarification and notifications reports
